

**SPEEDSET
DUTY
BELT**
DutySmith

The SpeedSet Duty Belt is a radically different duty belt for uniformed professionals. It is, by far, the most advanced system on the market. It can be set up in seconds and reconfigured on the fly — without removing the belt. Disassembling an entire belt to remove a flashlight holder is now a thing of the past. The SpeedSet duty belt improves on typical duty belts in a number of ways: added comfort, safety, adjustability, and ease of use. The SpeedSet Duty Belt features the smallest buckle, designed for any duty belt, and officers receive up to 25 percent more usable belt space. For more info: (888) 557-4543 or www.americancopmagazine.com/dutysmith

**GLOCK
TACTICAL
MAG FLOOR PLATES** TangoDown

Made of high quality, glass-filled nylon for superior strength, these floor plates offer plenty of non-slip surface to strip a stubborn magazine from the weapon, even if stuck with mud, sand or ice. Excellent for 1-handed use too, just hook the floor plate under a belt, against a holster, etc. to stay in the fight. The VT Tactical Floor Plates also provide a larger, more positive surface when pulling magazines from pouches, speeding reloads. Concave dots allow easy numbering and marking of spare magazines. MSRP is \$18.50 for a pack of five. For more info: www.americancopmagazine.com/tangodown

TAB-LOCK WITH UNI-CONN FOR THE IPAD & IPAD2

RAM Mounting Systems

RAM products are renowned for their simple yet effective designs. The new RAM Tab-Lock with Uni-Conn for the Apple iPad and iPad 2 is a perfect example of this. The RAM iPad locking dock features a unique patent pending design which enables the use of the factory iPad cables with docking connector for charging as well as other functions. Also works with most aftermarket cables and modules with docking connectors. With the vast variety of available cable/docking connector accessories for the iPad you can quickly dock your iPad for charging, line out audio, external GPS antenna and much more. Spring loaded and equipped with a keyed lock, this compact yet durable holder won't take up a lot of space yet provides loads of security. For more info: (206) 763-8361 or www.americancopmagazine.com/ram-mounts

3535 SNEAK UNIVERSAL HOLSTER INSERT

Maxpedition

The (#3535) Sneak is an adjustable holster designed to fit most popular handgun sizes, as well as securely accommodating other items such as tools, laptop power supplies and similarly sized objects. The versatile Sneak design and hook field backing allows for various attachment layouts to any interior loop surface or CCW (concealed carry weapon) compartment in our Maxpedition bags and packs. It additionally comes equipped with an elastic retention strap, ideal for securing a single magazine or like-sized item. Comes black and khaki. For more info: (310) 768-0098 or www.americancopmagazine.com/maxpedition

AUTOVU SHARPX LICENSE PLATE RECOGNITION CAMERA

Genetec

The AutoVu SharpX is an IP-based license plate recognition (LPR) camera specifically designed for law enforcement. It can scan thousands of vehicles per shift with the highest degree of accuracy available; quickly identify vehicles of interest; and receive alerts. This mobile LPR solution is ideal for vehicle and felon identification, post-crime data mining and information gathering. For more info: (866) 684-8006 or www.americancopmagazine.com/genetec

LE2 BODY WORN VIDEO CAMERA

VIEVU

The LE2 Body Worn Video Camera provides a cost effective and efficient option for law enforcement officials and other organizations to video-document and record all their actions. Weighing 3.5 ounces and measuring about the size of a pager, the waterproof, ruggedized LE2 easily clips onto an officer's lapel or belt. The cameras are easy to wear and use. Holding a video camera does not always make sense. Use VIEVU to record hands-free video and audio of important or critical incidents from the perspective of the wearer. The wearable video cameras significantly improve the efficiency of documentation and reduce time wasted on written reports. For more info: (888) 285-4548 or www.americancopmagazine.com/viewu

DENIM JEANS

CCW Breakaways

CCW Breakaways recently released their Jeans — a follow up product line to their existing Khakis and Cargos. The unique CCW Breakaways process and products are game-changers in the arm's length gunfight. Unique built-in, disguised holster-pockets have enlargeable "breakaway" openings, which enable: a faster-than-holster draw (.66 seconds 1-handed deployment), the deepest concealment (below the hip line-of-flexure), and the most comfortable carry system (no pinching or binding). Jeans are a traditional relaxed-fit wear, designed to carry and conceal compact semi-automatics, J-frames and similar revolvers. For more info: (717) 774-2152 or www.americancopmagazine.com/ccw-breakaways
